

United States Gypsum Company

Industrial Gypsum Division

101 South Wacker Drive

Chicago, IL 60606-4385

312 606-4000

Dear Valued Customer:

OSHA Hazard Communication Standard 29 CFR 1910.1200 covering Material Safety Data Sheets requires that we make available certain details relating to hazardous chemicals used in our products. This letter with a MSDS enclosure is our method of meeting the requirements of this regulation.

The MSDS data included with this letter may not cover all products you purchase from us. Several separate mailings are required due to multiple product categories and complex distribution patterns. However, within a short period you should have all of our MSDS data which relates to your line of business. If you don't receive a complete set of MSDS data or you require more copies at some future date, contact us at this office location:

UNITED STATES GYPSUM COMPANY
Industrial Gypsum Division
Department 983-1
101 South Wacker Drive
Chicago, Illinois 60606-4385

Should you require additional information concerning details covered in an MSDS, the address and telephone contacts are listed at the top of the face sheet.

We suggest you retain the MSDS information for future reference and guidance.

Sincerely,

UNITED STATES GYPSUM COMPANY
Industrial Gypsum Division
